

Powerful Respiratory Support*

Rocky Mountain Throat Syrup™ is a fast-acting cough syrup your whole family can use.* It is vegan and gluten free. We make this syrup in the United States, in our Santa Fe, New Mexico manufacturing facility, using herbs sourced from the United States.

Herbs in Rocky Mountain Throat Syrup™

Rocky Mountain Throat Syrup™, a synergistic herbal formula, promotes sinus, throat, bronchiole and lung health.* Below is a list of the syrup's herbs and the benefit each provides your family.

Osha (*Ligusticum porteri*) root grows wild in the high-altitude Rocky Mountain range. It has been used by generations of Southwestern Native Americans and Hispanics to support their respiratory health.* Osha root has a celery-like scent and taste. It helps thin mucus so it can be easily removed from the lungs*. Osha root also helps reduce and relieve sinus pressure.* Additionally, it calms the tickle in the throat and stops the urge to cough.* All of these benefits are why we believe Osha root is the **must-have herb** in our deliciously powerful throat syrup.*

White Pine (*Pinus strobus*) bark grows in the Northeastern United States. It supports the throat by promoting the production of healthy, thin mucus.*

Wild Cherry (*Prunus serotina*) bark grows throughout the United States. It relaxes tight lungs and opens the bronchioles.*

Spikenard (*Aralia racemosa*) root grows in the Eastern part of the United States. It loosens and clears excessive mucus and supports a healthy throat and bronchi.*

Balsam Poplar (*Populus balsamifera*) bud grows in the United States and Canada. It thins mucus in the lungs and stimulates its removal.*

Bloodroot (*Sanguinaria canadensis*) root grows in the Eastern part of the United States. It ensures a healthy blood circulation in the lungs and also clears mucus.*

The herbs in Rocky Mountain Throat Syrup™ work together to provide your family with the powerful respiratory support and relief they need.*

Herbs, Etc.'s Commitment to Preserving Osha Root

Our commitment to Osha root goes beyond our belief in its medicinal qualities. Herbs, Etc. works with plant preservationists to ensure the sustainability of this important botanical. Learn more about Osha root sustainability by visiting Rocky Mountain Throat Syrup™ pages at herbsetc.com.

Herbal Medicines Made Right™

Herbs, Etc.'s unwavering company philosophy is to do what's right. Our philosophy extends to how we make herbal medicines for health-conscious customers like you.

We start by using our herbalist training, and years of experience, to identify and select the right herbs that provide the medicinal properties needed to make each of our herbal medicines.

Then, our unique processes extract all of the active constituents from each whole fresh or dried herb. We use heat-free processes not only to extract but to preserve the herbs' medicinal properties.

Throughout our process, we follow good manufacturing practices. Each product is released only after it goes through rigorous quality control to ensure safety and potency.

We do all of this to bring you Herbal Medicines Made Right™.
